

“Company X’s” Packaging Policy.

“Company X” aims to develop cost effective packaging that ensures product protection and meets customers needs with the minimum effect on the environment. All “Company X” packaging complies with the applicable Irish Legislation (The Waste Management (Packaging) Regulations, 2007), the Essential Requirements contained therein and EU Legislation (Directive 2004/12/EC on Packaging and Packaging Waste).

This is implemented by:

- Optimising packaging through prevention & minimisation techniques.
- Using returnable packaging systems with our customers & suppliers.
- Choosing easily recyclable materials.
- Selecting materials with a high recycled content.
- Choosing sustainable sources for packaging materials.

By driving this policy it is “Company X’s” intention to reduce the amount of packaging placed on the Irish market, thereby ensuring our compliance with all relevant regulations and easing any burden on the environment by using sustainable resources. Our continued membership of the Repak compliance scheme demonstrates our desire for a responsible approach to dealing with our packaging waste.
